

BLAST BIG BLOODY BLOB

Red Alert!

RIVERSIDE, EGYPT - A state of emergency has been declared throughout the country as millions of citizens remain without water, and pipes and faucets continue to bleed all over the place.

Natural Resources and Environmental Protection Officials are currently surveying the damage, examining water samples, analyzing and diagnosing water quality, and preparing a Governmental study.

Staff Chartumologists at the Natural Resources Dept. have been able duplicate the

pollutants, but could not reverse or resolve the problem.

Attempts to locate alternate water sources

Affected area. All tributaries, arteries and veins in the Red, White & Blue Nile.

have failed, so uncontaminated potable water is now available only in the Goshen area.

Angry residents are complaining:

*"Water, water everywhere,
but not a drop to drink;
What do you think,
of the red ooze in my sink?"*

Unless a drastic change occurs in the higher government levels, the water crisis and state of emergency will continue through the week.

THE NATIONAL GEOGRAPHIC:

Nile Denial

BY DR. CHARTUM

A mighty natural force, the Nile River deserves our respect, reverence and personal adoration.

The Mighty Nile begins its long trek from headwaters deep in the heart of Africa via the White and Blue Nile merging into one powerful river at Khartoum in the Sudan.

Flowing through Ethiopia and central Egypt, the world's longest river continues to flow northward for 4,150 miles, then divides into streams of the fertile delta region until the Mediterranean Sea.

The stricken Nile, lifeblood of our irrigation and canal system, now carries the repulsive odor of dead fish. At this critical time, we pray for the Nile's restoration and revitalization, to Save our

King and Country.

"O, Thou great and Almighty Nile, we worship Thee, our Supreme Provider and Sustainer; Thou gracefully lined with bulrushes, Who swalloweth our enemies' infants, and Allowest us to grow daily bread and sustenance for man and animal.

"Thou Art the Mother of all Rivers, the Bear-er of all life. Thou issueth forth the fish, frog and beast. Our blessings flow from You, O mighty Nile, our fortunes rise and fall with You,

Thou Amazing Wonder of the World! "O Great One, O Nile, Save Our country, Save us, Save our Land!"

"The Nile Was, the Nile Is, and the Nile Shall be, forever and forever, and let us all say Amen."

WATCH YOUR HEALTH

HEART & BOWEL PROBLEMS

Dear Dr.,

My health is generally fine, but please help my abnormalities that I have been recently experiencing.

1) My doctors have advised me to take regular blood baths to remedy a skin disorder.

My blood pressure is rising, but the wild zoo out there is enough to make your blood boil.

2) I'm being told that I suffer from a hard heart condition, but I feel no soft spots, no sensitivities, and no hesitations. I actually feel stronger than ever! What can possibly be wrong with me?

3) I transcend the normal bodily digestive functions that affect ordinary humans. To me, that's Divine! Anything wrong with that?

P.

Dear P.,

1) Groan

2) Save yourself and others a lot of heartache. I highly recommend that you let go, free up the system, and avoid oppression. Your hardening of the heart is not arterial sclerosis by cholesterol that's remedied with bypass surgery. What you need is a Pass over!

3) The human excretory system normally relieves itself of waste produced from food intake, to prevent constipation, so you're really full of it. I suggest you take a strong demythesizer, plus a good dose of humility. Should your condition persist, I will see you in the morning.

Going Green for a Better Environment!

Where the Grass is Greener

BY I. M. GREEN

From the Papyrus Publisher

Read all about it!

Dear Friends,

At first, it began as a lone, solo voice, but now we've grown by leaps and bounds, literally swamped by thousands of volunteers who joined our movement.

As you see, we've taken over the place!

Instead of relying on People news, we bring you here direct information by our own reporters in the field.

We rally and raise our voices in unison right here, loud and clear for all to hear:

"Let My People Go!"

F. Rogue

People liked the "Prince of Egypt" movie, yet I, who was personally there during the Plagues, was quite disappointed.

You call that celluloid stuff 'animation?' I'm no movie maven, but if you want animation, that's me! Those Hollywooders lumped all the ten plagues into one collage, leaving me out of the picture!

Back in the old country, who ever heard of artificial sound bytes and visual effects? We produced it all ourselves without silly cartoons! We gave it all our body and soul, warts and all.

As an amphibian, the lily is my pad. It wasn't easy for me to leave my sweet home's cozy ooze to visit those alien people places. Only a hop, skip and jump away, they live in a sterile and unnatural environment. As they say: 'Different strokes for different folks.'

Unlike our great outdoors where everything is random and uneven, round and curvy, People places are so straight and boxy.

Unlike our real full-bodied stones lounging casually around the pond, people bricks are flat, straight and pressed tightly atop each other that form impassable keep-out walls.

People places have dry hard floors, no soft and mushy feeling like we're used to. Instead of letting water flow freely, they force water into narrow hollow pipes, capturing and locking it in "sinks" and "baths." Sterile people water lacks any bugs or nutrients; a month ago, their whole water system was a bloody mess.

They wish I'd stop making waves and shut my trap, but I refuse to be quiet! We recognize our

limits and borders, but I jump at the opportunity to raise my voice against slavery and oppression!

THE GRASS ISN'T GREENER!

Guess what? I discovered that the grass is not greener on the other side!

I ran into a people place, a wall frieze made to look like our lovely pond! My eyes popped out at the serene scene of tall grass and bulrushes.

But alas, the tall 'grass' had no body, taste or movement. It was just an 'ersatz' mural trying to imitate the real thing!

We had the run of the place. We tried to sing and entertain our hosts, but they were scared and kept hitting us.

Without trees or branches underfoot as in our Froggy Bottom, everything ran smoothly, except in the People "kitchen," where the dough got sticky.

Ouch! The oven's burning hot, and some of our fellows of blessed memory made inspiring leaps of faith.

Unfortunately, I'm treated like a nuisance and a Plague while I'm really on an important mission. People Places are impressive, but also oppressive. They actually beat up on the people who work for them. I hope we ease the suffering of those poor souls.

I yearn for ol' camp swampie back home, but this was really some adventure!

Mission accomplished, so now it's time to croak!

Toadah Rabah!

POETRY

The Marines Marshing Song

From the shores, of the Nile,
To the Halls, of the Pharaoh.
We cry, out, for Freedom
Oh "Let my People Go!"

Our major landing force,
Begins with one Big One,
Our full faith in G-d,
We'll surely overcome!

We go forth like you've never seen,
From under rocks and under logs,
All dressed up in striking Green,
We are the proud Frog Marines!

THE NEW MATH

Multiplication
Made Easy:
The old way:
 $1 + 1 = 2$
 $1 \times 1 = 1$

Now, the new way:
Take 1 and tap it,
and you get many,
many, more!

WEATHER ADVISORY: Frog changing visibility

(Week of Shevat 1 - 7): Blazing hail storm predicted. Points South of the border and Northwest in Goshen not affected. Fearful are advised to protect livestock indoors from storm.

Long range forecast: (Adar 1-7) Gusts of easterly winds originating in Red Sea region large locust concentration over area. Overcast skies, followed by fair weather.
